

# USB Endoscope

With the endoscope to explore with ease even hard to reach places and to make a clear picture overall. The flexible gooseneck is 66 cm long, for example, is ideal for protecting the tubes and pipes in the house or car from damage or corrosion. The dimmable LED camera light ensures optimum illumination. The endoscope is ideally suited for homeowners, hobbyists and amateur biologists, for example, to build animal or to inspect bird nest boxes carefully. The 2-meter-long USB cable. Gives you plenty of play room and virtually nothing is unattainable with the extra services on your notebook. The included software allows video recording with snapshot function. Power is supplied directly through the USB interface.
